PRODUCT

EditSutra: AI editing plugin for Adobe Premiere Pro (Mac and Windows beta). Creators who record in Hinglish or Hindi lose hours cutting silences, filler words and retakes by hand, and most AI editing tools are built for English. I designed, built and shipped EditSutra to fix that, with licence keys and signed in-app updates.

- AI rough cut: removes silences, filler words, stutters and failed retakes; keeps the take closest to the script
- Offline AI captions in Hinglish, English and Hindi; animated word-by-word styles
- AI Shorts finder with hook scoring, 9:16 auto-reframe and one-click Reels export
- Auto sound design, B-roll matching, voice cleanup, animated graphics and maps
